PHILOSOPHICAL MAGAZINE B, 1995, VOL. 72, NO. 6, 637–644

SUBJECT INDEX

Vol. 72

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
AlN structure, oxygen localization in	1657 A
Adhesive contact in elastic spheres	783 A
$Ag_{37}Cu_{63}$, structure of	1485 A
AlN on FeAl	1281 A
Al, anodic films on, electrolytes in	401 B
Al, grain boundary motion in	361 L
$Al_{11}Co_4$, structure of	79 L
$Al_{70}Mn_9Pd_{21}$ quasicrystal, structure of	199 L
Al_2O_3, glass-coated, dewetting of	269 L
Al_2O_3, grain boundaries in	529 A
AlBe alloys, amorphous phases in	167 L
AlCuFe, icosahedral phases in	101 B
AlCuMgAgZn alloys, precipitation in	765 A
AlGaAs, alloy fluctuations in	1015 A
Alkali halides, melting properties of	577 B
Alkali–borate glasses, structure of	535 B
AlLiCu quasicrystal, defects in	1 L
Alloy fluctuations in AlGaAs	1015 A
Alloys, B2, correlation effects in	249 A
Alloys, ordered, diffusion in	871 A
AlMnSi, annealing twins in	193 L
AlPdMn quasicrystals, plastically deformed	375 L
AlPdRu, quasicrystal	239 L
Alumina, chromium diffusion in	861 A
AM1 superalloy, lattice mismatch in	669 A
Amorphous alloys, muon–hydrogen in	275 B
Amorphous C:H, conductivity of	335 B
Amorphous Si, Hall effect in	135 L
Amorphous Si, structural relaxation in	1 B
Amorphous SiC, structure of	913 A
Amorphous Si:H, new H bond in	363 B
Amorphous Si:H on soda-lime glass	1351 A
Amorphous Si:H, photoconductivity in	35 B
Amorphous SiN:H, conductivity in	331 L
Amorphous SiO_2, growth of	385 L
Anisotropic solids, fracture mechanics of	1471 A
Anodic films of Al, electrolytes in	401 B
Anomalous yielding in $L1_2$ alloys	383 A
Antiphase boundaries, analysis of	1121 A
Antiphase boundaries in FeAl	21 L
As–H complex in Si	193 B
As_2Se_3, light-induced phenomena in	117 L
$AuCu_3$(Ag) II superlattice, twinning in	981 A
B nitrogen aggregate in diamond	351 B
BaCuO rare earth compounds, growth of	727 A
Bcc transition metals, grain boundaries in	1311 A

Bi embedded in Zn, nucleation of . . . . . 411 L
BN on Si, thin films of . . . . . 163 L
Bond-centred muonium in Si . . . . . 201 B
Boundary sliding in PbSn . . . . . 891 A
Bubbles, migration of to vacancy sources . . . . . 41 L

C, glassy, C^+ implanted . . . . . 1031 A
C:H, conductivity of . . . . . 335 B
C_{70} and C_{60}–C_{70} films, disorder in . . . . . 185 L
C_{70}, muons in . . . . . 259 B
C_{70}, rhombohedral domains in . . . . . 1141 A
CaF_2 and NaF, vaporization of . . . . . 563 B
CaF_2, melting of . . . . . 601 B
Carbon nanotubes, structure analysis of . . . . . 139 A
Carbon onions, concentric-shell . . . . . 149 B
Catalytic, $PtGe/Al_2O_3$, structure of . . . . . 1495 A
CdTe/GaAs, misfit dislocations in . . . . . 635 A
Cellular precipitation in CuSb alloys . . . . . 369 L
Ceramics, diffusion of organics in . . . . . 267 A
Charge transport in solid nitrogen . . . . . 241, 251 B
Chromium diffusion in alumina . . . . . 861 A
Closed surfaces, metallic, crumpling of . . . . . 417 L
Co alloys, disordered, segregation in . . . . . 1331, 1341 A
Columnar ice, cracking and sliding in . . . . . 87 L
Compaction pressure, effect of on $Ag_{37}Cu_{63}$ . . . . . 1485 A
Composite materials, second phases in . . . . . 515 A
Composites of Ti/SiC_f, vacuum sprayed . . . . . 707 A
Concentric-shell carbon onions . . . . . 149 B
Conductive LaSrCoO on MgO, structure of . . . . . 1513 A
Constant photocurrent method . . . . . 489 B
Contact angle, effect of gravity on . . . . . 1505 A
CoO, defects in . . . . . 1099 A
Copper precipitates in iron . . . . . 361 A
Copper, slip bands in . . . . . 691 A
Copper, unstable stacking in . . . . . 881 A
Correlation effects in B2 alloys . . . . . 249 A
Correlations for polycrystalline structures . . . . . 199 A
Cr_2B polytypism in . . . . . 963 A
Crack tip in Si . . . . . 251 L
Crack tips, flutter of . . . . . 723 A
Crack tips, nucleation of dislocations from . . . . . 415 A
Cu, Ag and Au, diffusion of in Ti . . . . . 1649 A
Cu_3Au, disordered zones in . . . . . 1413 A
Cu_3Au, vibrational entropy in . . . . . 421 L
CuMn, plastic deformation in . . . . . 315, 1239 A
Current–voltage for solar cell . . . . . 375 B
CuSb alloys, cellular precipitation in . . . . . 369 L
CuZn, yield stress in . . . . . 1189 A
CuZnAl 18R martensite, stabilization of . . . . . 1633 A

Defect structure in irradiated Ge . . . . . 99 L
Defects in CoO . . . . . 1099 A
Defects in Mn . . . . . 337 A
Defects in quartz . . . . . 1421 A
Defects in quasicrystals . . . . . 311 L
Defects in zinc . . . . . 603 A
Deformation in TiAlNb . . . . . 1559 A
Deformation of titanium aluminides . . . . . 341 A

Degenerate semiconductors, stress in . . . . . 13 B
Diamond films, photoconductivity in . . . . . 257 L
Diamond platelets, nitrogen in . . . . . 21 A
Diamond, B nitrogen aggregates in . . . . . 351 B
Diamond, R4/W6 defect in . . . . . 81 B
Diffusion in ordered alloys . . . . . 871 A
Diffusion of ^{60}Co in VCo . . . . . 1547 A
Diffusion of grain boundaries . . . . . 1589 A
Diffusion of organics in ceramic materials . . . . . 267 A
Diluted hopping systems . . . . . 505 B
Dislocation and point defect interactions . . . . . 949 A
Dislocation arrays, disordered . . . . . 49 L
Dislocation distribution in FeSi . . . . . 1221 A
Dislocation mobility in silicon . . . . . 453 A
Dislocation nucleation in heterostructures . . . . . 281, 297 A
Dislocation velocities in zirconia . . . . . 59 A
Dislocation, mobile, exhaustion . . . . . 905 A
Dislocations in 2D quasicrystals . . . . . 87 L
Dislocations in FeAl + B . . . . . 1301 A
Dislocations in GaSb and GaAs . . . . . 837 A
Dislocations in quartz . . . . . 497 A
Dislocations in quasicrystals . . . . . 353 L
Dislocations in ZnSe . . . . . 113 A
Dislocations near epitaxial layer interfaces . . . . . 1531 A
Dislocations, effects of surface stress on . . . . . 81 A
Dislocations, kinematic generation of . . . . . 245 L
Dislocations, nucleation of from crack tips . . . . . 415 A
Disorder in C_{70} and C_{60}–C_{70} films . . . . . 185 L
Disorder model, Gaussian . . . . . 435 B
Disordered dislocation arrays . . . . . 49 L
Disordered systems, hopping in . . . . . 125 B
Disordered zones in Cu_3Au . . . . . 1413 A
Displacement cascades in Ti . . . . . 1261 A
Doped semiconductors, density of states in . . . . . 475 B
Dynamics of tissues . . . . . 311 B

Elastic medium, anisotropic, Green's function for . . . . . 405 L
Elastic spheres, adhesive contact in . . . . . 783 A
Elasticity of multilayers . . . . . 1431, 1445 A
Electron-doped NiThCuO, TEM of . . . . . 105 A

Fatigue deformation in stainless steel . . . . . 297 L
Faults in $MoSi_2$ . . . . . 1 A
Faults, planar, in crystals . . . . . 11 L
Fe_2B, polytypism in . . . . . 963 A
FeAl + B, dislocations in . . . . . 1301 A
FeAl, AlN on . . . . . 1281 A
FeAl, antiphase boundaries in . . . . . 21 L
FeAl, N absorption isotherms of . . . . . 931 A
Fermi contact field of muons in Ni . . . . . 285 B
FeSi, dislocation distribution in . . . . . 1221 A
FeTi, slip systems in . . . . . 303 L
FeV_2O_4 and $TiFe_2O_4$, NEPCO effect on . . . . . 617 B
Film growth, heterogeneous, scaling in . . . . . 55 L
Flow stress anomalies . . . . . 905 A
Flutter of crack tips . . . . . 723 A
Fracture mechanics of anisotropic solids . . . . . 1471 A

GaAs and GaSb, dislocations in . . . 837 A
GaAs, H defect states in . . . 183 B
GaAs, II–VI compounds on . . . 39 A
GaSb and GaAs, dislocations in . . . 837 A
Gaussian disorder model . . . 435 B
Ge, irradiated, defect structure in . . . 99 L
GeSi heterostructures, stacking faults in . . . 305 A
Glass-coated Al_2O_3, dewetting of . . . 269 L
Glassy alkali–borates, structure of . . . 535 B
Glassy C, C^+ implanted . . . 1031 A
Glassy $Pb_{20}Ge_{19}Se_{61}$, irradiated . . . 417 B
Glassy SeTeZn, conduction in . . . 513 B
Glide transfer in TiAl . . . 1381 A
Gold films, grain boundary diffusion in . . . 805 A
Grain boundaries in Al_2O_3 . . . 529 A
Grain boundaries in bcc transition metals . . . 1311 A
Grain boundaries in silicon . . . 545, 561 A
Grain boundaries, properties of . . . 71 L
Grain boundary diffusion in gold films . . . 805 A
Grain boundary inhomogeneities . . . 829 A
Grain boundary motion in Al . . . 361 L
Grain growth, Monte Carlo studies of . . . 737 A
Grain growth, two-dimensional, model for . . . 429 L
Grain-boundary diffusion . . . 1589 A
Grating technique, photocarrier . . . 551 B
Gravity, effect of on contact angle . . . 1505 A
Green's function for anisotropic elastic medium . . . 405 L

H bond in amorphous Si:H . . . 363 B
H defect states in GaAs . . . 183 B
H transport, plasma-driven, in metals . . . 301 B
H-induced platelets in Si . . . 1057 A
Haematite to maghemite transformation . . . 105 L
Halides, alkali, properties of near melting . . . 577 B
HCaNaNbO materials, interlayer cracks in . . . 161 A
HCO isotopomer . . . 267 B
Heavy fermion systems, Wilson ratio for . . . 123 L
Heterodiffusion of grain boundaries . . . 829 A
Heteroepitaxial crystal growth . . . 231 L
Heterogeneous film growth, scaling in . . . 55 L
Heterojunction analysis . . . 75 B
Heterostructures, dislocation nucleation in . . . 281, 297 A
Homogeneity of solid solutions . . . 813 A
Homogeneous phase of jellium model . . . 295 B
Hopping in disordered systems . . . 125 B
Hopping in $Nd_{2-x}Ce_xCuO_4$ thin films . . . 223 L
Hopping systems, diluted . . . 505 B

Ice, columnar, cracking and sliding in . . . 87 L
Ice, saline, cyclic loading of . . . 209 A
Icosahedral phases in AlCuFe . . . 101 B
Icosahedral phases in TiZrFe . . . 1397 A
II–VI compounds on GaAs . . . 39 A
Interlayer cracks in HCaNaNbO . . . 161 A
Intermetallics, precipitation of . . . 1161 A
Interphase boundary in TiCr . . . 175 L
Iron, copper precipitates in . . . 361 A

Jellium model, homogeneous phase of . . . 295 B

Kinematic generation of dislocations . . . . . 245 L
$KTiOPO_4$, second-harmonic generation in . . . . . 115 B

$L1_2$ alloys, anomalous yielding in . . . . . 383 A
Laser crystallized SiC . . . . . 323 B
LaSrCoO on MgO, microstructure of . . . . . 1513 A
LaSrCuO and NdCeCuO . . . . . 529 B
Light particles, quantum diffusion of . . . . . 209, 233 B
Light-induced phenomena in As_2Se_3 . . . . . 117 L

Maghemite from haematite transformation . . . . . 105 L
Magnesio–aluminate spinel, irradiated . . . . . 155 L
Martensitic CuZnAl 18R, stabilization of . . . . . 1633 A
MC2 superalloys, strain in . . . . . 1043 A
Melting of CaF_2 . . . . . 601 B
Metallic closed surfaces, crumpling of . . . . . 417 L
Mg, thermal vibrations in . . . . . 1357 A
MgO–V and V–MgO interfaces . . . . . 179 A
Misfit dislocations in CdTe/GaAs . . . . . 635 A
Misfit dislocations near epitaxial layer interfaces . . . . . 1531 A
Mn doping in TiAl . . . . . 579 A
Mn, defects in . . . . . 337 L
Mo_5Si_3 precipitates in $MoSi_2$ . . . . . 997 A
Modulated quasicrystal structures . . . . . 345 L
Monte Carlo studies of grain growth . . . . . 737 A
$MoSi_2$, faults in . . . . . 1 A
$MoSi_2$, Mo_5Si_3 precipitates in . . . . . 997 A
$MoSi_2$, plastic deformation of . . . . . 1075 A
MuCO, isotopomer of HCO . . . . . 267 B
Multilayered Se/CdSe, disorder in . . . . . 67 B
Multilayers, elasticity of . . . . . 1431, 1445 A
Muon implantation . . . . . 159 B
Muon–hydrogen correlation in alloys . . . . . 275 B
Muon-state dynamics in Si . . . . . 161 B
Muonium, quantum diffusion of . . . . . 233 B
Muons in Ni, Fermi contact field of . . . . . 285 B

N absorption isotherms of FeAl . . . . . 931 A
N, solid, charge transport in . . . . . 241, 251 B
NaF and CaF_2, vaporization of . . . . . 563 B
Nanocrystals, detection of . . . . . 619 A
Nanotubes, carbon, structure analysis of . . . . . 139 A
$NbCr_2$ Laves phase, stacking faults in . . . . . 147 L
$Nd_{2-x}Ce_xCuO_4$ thin films, hopping in . . . . . 223 L
NdCeCuO and LaSrCuO . . . . . 529 B
NEPCO effect of spinels . . . . . 617 B
NiAl, B2, core structure and mobility in . . . . . 1671 B
Nickel-based superalloy, planar defects in . . . . . 403 A
NiO, surface structure of . . . . . 121 A
NiThCuO, electron-doped, TEM of . . . . . 105 A
Nitrogen in diamond platelets . . . . . 21 A

Ordered alloys, diffusion in . . . . . 871 A
Ordered intermetallics, precipitation of . . . . . 1161 A
Overlapping stacking faults . . . . . 1173 A
Oxide films on Ta, growth of . . . . . 1409 A
Oxides, strain transfer in . . . . . 231 L

Oxygen localization in the AlN structure . . . . . 1657 A

p–i–n solar cell, collection in . . . . . 589 B
$Pb_{20}Ge_{19}Se_{61}$ irradiated glass, conduction in . . . . . 417 B
$PbSc_{0.5}Nb_{0.5}O_3$, microstructure of . . . . . 215 L
PbSn, boundary sliding in . . . . . 891 A
Peierls–Nabarro model for screw dislocations . . . . . 207 L
Perovskite $PbSc_{0.5}Nb_{0.5}O_3$, microstructure of . . . . . 215 L
Phase transformation in TiAl . . . . . 291 L
Phase transformations in quasicrystals . . . . . 61 L
Phase transition in potassium hydrogen tartrate . . . . . 91 B
Photocarrier grating technique . . . . . 551 B
Photoconductivity in diamond films . . . . . 257 L
Photocurrent method, constant . . . . . 489 B
Planar faults in crystals . . . . . 11 L
Plasma-driven H transport in metals . . . . . 301 B
Plastic deformation in CuMn . . . . . 315, 1239 A
Plastic deformation of $MoSi_2$ . . . . . 1075 A
Point defect and dislocation interactions . . . . . 949 A
Point defects in SbInTe . . . . . 627 B
Poly[3-(carbazolyl-9-yl)propyl]methylsiloxane . . . . . 19 B
Polycrystalline structures, correlations for . . . . . 199 A
Potassium hydrogen tartrate, phase transition in . . . . . 91 B
Precipitation in AlCuMgAgZn alloys . . . . . 765 A
$PtGe/Al_2O_3$ catalysts, structure of . . . . . 1495 A

Quantum diffusion of light particles . . . . . 209, 233 B
Quartz, defects in . . . . . 1421 A
Quartz, dislocations in . . . . . 497 A
Quasicrystal structures . . . . . 345 L
Quasicrystal to crystal transformation . . . . . 61 L
Quasicrystalline $Al_{11}Co_4$, structure of . . . . . 79 L
Quasicrystalline AlLiCu, defects in . . . . . 1 L
Quasicrystalline AlPdMn, plastically deformed . . . . . 375 L
Quasicrystalline AlPdRu . . . . . 239 L
Quasicrystalline structure of $Al_{70}Mn_9Pd_{21}$ . . . . . 199 L
Quasicrystals, defects in . . . . . 311 L
Quasicrystals, dislocations in . . . . . 353 L

R4/W6 defect in diamond . . . . . 81 B
Rare earth BaCuO compounds, growth of . . . . . 727 A
Rhombohedral domains in C_{70} . . . . . 1141 A
Rotation domains in SiN . . . . . 1131 A

Saline ice, cyclic loading of . . . . . 209 A
SbInTe, point defects in . . . . . 627 B
Screw dislocations, Peierls–Nabarro model for . . . . . 207 L
Se/CdSe multilayers, disorder in . . . . . 67 B
Second phases in composite materials . . . . . 515 A
Second-harmonic generation in $KTiOPO_4$ . . . . . 115 B
Segregations in disordered Co alloys . . . . . 1331, 1341 A
Semicoherent precipitation in YBCO . . . . . 33 L
Semiconductors, doped, density of states in . . . . . 475 B
SeTeZn glasses, conduction in . . . . . 513 B
Si, amorphous, Hall effect in . . . . . 135 L
Si, amorphous, structural relaxation in . . . . . 1 B
Si, As–H complex in . . . . . 193 B
Si, BN on, thin films of . . . . . 163 L

Si, bond-centred muonium in . . . . . 201 B
Si, crack tip in . . . . . 251 L
Si, H-induced platelets in . . . . . 1057 A
Si, muon-state dynamics in . . . . . 161 B
SiC, amorphous, structure of . . . . . 913 A
SiC, properties of . . . . . 323 B
Si:H, amorphous, on soda-lime glass . . . . . 1351 A
Si:H, amorphous, photoconductivity in . . . . . 35 B
Silicon, dislocation mobility in . . . . . 453 A
Silicon, grain boundaries in . . . . . 545, 561 A
SiN, rotation domains in . . . . . 1131 A
SiN, vacancy clusters in . . . . . 111 L
Si_3N_4, transition elements in . . . . . 459 B
SiN:H, amorphous, conductivity in . . . . . 331 L
SiO_2, amorphous, growth of . . . . . 385 L
Slip bands in copper . . . . . 691 A
Slip systems in B2 FeTi . . . . . 303 L
Solar cell model parameters . . . . . 375 B
Solar cell, p–i–n, collection in . . . . . 589 B
Solid solutions, structure of . . . . . 813 A
Spinel, magnesio–aluminate, irradiated . . . . . 155 L
Spinel, zinc chromate, zinc oxide in . . . . . 651 A
Stacking faults in GeSi heterostructures . . . . . 305 A
Stacking faults in $NbCr_2$ Laves phase . . . . . 147 L
Stacking faults, analysis of . . . . . 1121 A
Stacking faults, overlapping . . . . . 1173 A
Stainless steel, ferritic, fatigue deformation in . . . . . 297 L
Stoichiometry effects in B2 NiAl . . . . . 1671 A
Strain rate sensitivity . . . . . 905 A
Stress analysis in TiAl . . . . . 1201 A
Stress in degenerate semiconductors . . . . . 13 B
Superalloy AM1, lattice mismatch in . . . . . 669 A
Superalloy, nickel-based, planar defects in . . . . . 403 A
Superalloys, MC2, strain in . . . . . 1043 A
Superconducting YBCO, microstructure of . . . . . 285 L
Superconducting YBCO-247 . . . . . 383 B
Superdislocations in Ti_3Al . . . . . 393 L
Superlattice of $AuCu_3$(Ag) II, twinning in . . . . . 981 A
Surface stress effect on dislocations . . . . . 81 A
Surface structure of NiO . . . . . 121 A

Thermal vibrations in Mg . . . . . 1357 A
Thin-film heterojunction analysis . . . . . 75 B
Ti and Zr, twin boundaries in . . . . . 751 A
Ti, diffusion of Cu, Ag and Au in . . . . . 1649 A
Ti, displacement cascades in . . . . . 1261 A
Ti/SiC_f composites, vacuum sprayed . . . . . 707 A
Ti_3Al, superdislocations in . . . . . 393 L
TiAl, glide transfer in . . . . . 1381 A
TiAl, Mn doping in . . . . . 579 A
TiAl, phase transformation in . . . . . 291 L
TiAl, stress analysis in . . . . . 1201 A
TiAl, twinned, stress in . . . . . 1609 A
TiAlNb, deformation in . . . . . 1559 A
TiCr, interphase boundary in . . . . . 175 L
Tissues, dynamics of . . . . . 311 B
Titanium aluminides, deformation of . . . . . 341 A
TiZrFe, icosahedral phases in . . . . . 1397 A
Transition elements in Si_3N_4 . . . . . 459 B

Transport numbers for growth of oxide films . . . . . 1409 A
Twin boundaries in Ti and Zr . . . . . 751 A
Twinned TiAl, stress in . . . . . 1609 A
Twinning in AlMnSi . . . . . 193 L
Two-dimensional grain growth, model for . . . . . 429 L
Two-dimensional quasicrystals, defects in . . . . . 87 L

Unstable stacking in copper . . . . . 881 A

V–MgO and MgO–V interfaces . . . . . 179 A
Vacancy clusters in SiN . . . . . 111 L
Vacancy sources, migration of bubbles to . . . . . 41 L
V–Co, diffusion of ^{60}Co in . . . . . 1547 A
Vibrational entropy in Cu_3Au . . . . . 421 L

Wilson ratio for heavy fermion systems . . . . . 123 L

YBCO, microstructure of . . . . . 285 L
YBCO, semicoherent precipitation in . . . . . 33 L
YBCO-247 structure and conductivity of . . . . . 383 B
Yield stress in CuZn . . . . . 1189 A

Zinc, defects in . . . . . 603 A
Zinc oxide in zinc chromate spinel . . . . . 651 A
Zirconia, dislocation velocities in . . . . . 59 A
Zn, Bi embedded in, nucleation of . . . . . 411 L
ZnSe, dislocations in . . . . . 113 A

PHILOSOPHICAL MAGAZINE B, 1995, VOL. 72, NO. 6, 645–660

INDEX OF AUTHORS (WITH TITLES)

Vol. 72

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters
